

## **DROUGHT RESPONSE LEVEL 2 – Drought Alert Condition**

A Drought Response Level 2 condition applies when the San Diego County Water Authority notifies its member agencies that due to cutbacks caused by drought or other reduction in supplies, a consumer demand reduction of up to 20 percent is required in order to have sufficient supplies available to meet anticipated demands. The district board of directors shall declare the existence of a Drought Response Level 2 condition and implement the mandatory Level 2 conservation measures identified in this resolution.

All persons using district water shall comply with Level 1 Drought Watch water conservation practices during a Level 2 **Drought Alert**, and shall also comply with the following additional conservation measures:

1. Limit residential and commercial landscape irrigation to no more than three (3) assigned days per week on a schedule established by the general manager and posted by the district. During the months of November through May, landscape irrigation is limited to no more than once per week on a schedule established by the general manager and posted by the district. This section shall not apply to commercial growers or nurseries.
2. Limit lawn watering and landscape irrigation using sprinklers to no more than ten (10) minutes per watering station per assigned day. This provision does not apply to landscape irrigation systems using water efficient devices, including but not limited to: weather based controllers, drip/micro-irrigation systems and stream rotor sprinklers.
3. Water landscaped areas, including trees and shrubs located on residential and commercial properties, and not irrigated by a landscape irrigation system governed by section 5 (b) (1), on the same schedule set forth in section 5 (b) (1) by using a bucket, hand-held hose with positive shut-off nozzle, or low-volume non-spray irrigation.
4. Repair all leaks within seventy-two (72) hours of notification by the district unless other arrangements are made with the general manager.
5. Stop operating ornamental fountains or similar decorative water features unless recycled water is used.
